Europe this major meeting brought together veterinarians, scientists, clinicians and public health officials to share their experience in rabies control to examine the threat posed by the common rabies virus and emerging strains and to develop strategies for the prevention, control and eradication of rabies in Europe. Rabies in Europe reveals the true epidemiological situation of an often overlooked menace and presents the latest research by over 40 prominent scientists in rabies prevention and control. It proposes practical solutions and includes the official WHO recommendations issued from the meeting. The book provides researchers, healthcare professionals and public health officials with an up-to-date in-depth look at the threat still posed by rabies and shows how medical and scientific advances have been employed to stem the growing number of infections spreading from Eastern to Western Europe since the end of World War II.
